4 Auxiliary heating

For warm interior comfort before you start a winter's journey. The pre-heated cooling circuit also means that the

engine is protected during start up and fuel consumption is reduced. The system is operated either through the T91 or T100 remote control. The T100, along with its general Telesart features, has the Heating Time Management system. Simply enter your departure time, set the comfort level on the display and the system calculates the optimum, energy-saving pre-heating time according to the car's interior temperature. For the utmost convenience, Thermo Call enables direct activation and temperature setting by phone or SMS, regardless of range. The matching BMW Thermo Call app makes the feature even easier to control.

This modular system is designed around a base attachment for the headrest bars. A coat-hanger, folding table, universal hook or Apple iPad holder (see p11) can then be fitted. The **coathanger** allows clothes to be transported without creasing. It can also be detached from the mounting and used to carry clothes outside the vehicle. The **folding table** gives passengers in the rear a convenient surface to put things on and is tilt and height-adjustable. It also includes a foldout cupholder with a stylish chrome-look ring. The **universal hook** offers a convenient place to hang light shopping bags, suit hangers and the like. The Travel & Comfort system is finished in matt

black with silver highlights and goes perfectly with the interior of your BMW 4 Series Coupé.
